

Problem Based Learning Design Workshop Spring 2017

Provided by the Ohio STEM Learning Network (OSLN)-Akron Hub, this 3-day institute is designed to provide workshop attendees with an introduction to Problem-Based Learning (PBL) based on the model developed at the Illinois Mathematics and Science Academy® (IMSA) and adapted by National Inventors Hall of Fame® School ... Center for STEM Learning.

Participants will discover how to:

- Connect your district's teaching standards through a self-designed PBL
- Design a PBL unit considering the needs and interests of their learners for classroom use
- Identify ways to incorporate existing lessons into a PBL unit
- Understand what it means to be a learning coach in the PBL process
- Explore how PBL strategies increase collaboration, creativity and critical thinking

Limited Seats Remain

All grades and content areas welcome
