Workforce Development and Education Teacher Education, The Ohio State University

The correlation between CTE programing and teacher licensure.

CTE Funding

Leah Amstutz

Assistant Director of Career and Technical Education, Ohio Department of Education

The CTE funding model & Career Pathways

Hollenbeck Bayley Conference Center

275 South Limestone Street
Springfield, OH 45505

CTE Training Program

In collaboration with the Ohio STEM Learning Network, Global Impact STEM Academy will be hosting a professional development opportunity to discuss the implementation of career technical programing. Over the past two years Global Impact STEM Academy has been successful at looking at and delivering career technical education through a unique lens. This training brings together experts from The Ohio State University, Clark State Community College, and the Ohio Department of Education. Topics will range from CTE funding, teacher licensure, to program applications and logistics.

To register contact Global Impact's main office at 937-328-6575 or email kkohlbacher@globalimpactacademy by Friday, February 6. The \$150 cost of this event has been underwritten by OSLN so it can be provided free to participants.
