

Predict the Future!

A Program of The Actuarial Foundation

Modeling the Future Challenge

Engage your students in applied mathematics, data science, and real world problem solving in the 2023-24 school year.

Get a head start on the Modeling the Future Challenge—a national math modeling scholarship competition where students use real-world data to analyze risks and make recommendations that could change the world.

TRAINING FOR EDUCATORS

Apply for the Actuarial Process training program to learn how to implement the Challenge in your classroom, connect with fellow teachers, get access to cutting-edge resources that will help your students succeed, and **earn 15 professional development hours** by participating in the virtual training program.

Learn more or apply now at:

WORKSHOPS FOR CLASSES, CLUBS, AND GROUPS

Apply to secure your group's spot in the all expenses paid 1-day field trip to a local university for an on-campus, interactive event. Students will be guided through an MTFC scenario, receive a tour of the campus, and learn from university faculty, students, and actuarial professionals.
